

2a.) $\beta = \frac{2\pi}{N}$, $N = \{25, 50, 100, 200, 400\}$, $\lambda = 2\pi$

N	β
25	.251
50	.126
100	.063
200	.031
400	.016

As expected, β decreases as N increases.
